System Analysis and Design (CSC329)

Algorithm and Complexity Analysis (CSC423)

Operations Research (CSC438)

Software Engineering(CSC401)

Modelling and Simulation (CSC412)

CAREER OBJECTIVE

My career goal as a highly motivated and enthusiastic frontend engineer is to land a challenging position in a fast-paced company where I can use my technical expertise and creativity to design and build cutting-edge, user-friendly web applications that satisfy the needs of a wide range of users. I'm excited to join a team of seasoned professionals, support the expansion of the business, and keep learning new things about the industry. My ultimate goal is to establish myself as an organization's valued and valuable asset by providing top-notch, useful, and aesthetically pleasing web solutions.

WORK EXPERIENCE

Software Developer Intern

Sunnet Systems and Datacom Services   January 2018 - July 2018

- Utilizing HTML, CSS, and JavaScript, I created and managed the company's web-based applications.
- To ensure the effective completion of projects, I worked with cross-functional teams that included back-end developers, designers, and project managers.
- I offered a seamless user experience across different devices, responsive design concepts were implemented.
- Utilized version control systems such as Git to manage source code and track changes.
- Participated in code reviews and gave the rest of the team helpful criticism.
- Stayed up-to-date with the latest front-end technologies and industry trends.
- Developed an API that got user data from a client's website.

Software Engineer Intern

Lagos Business School   March 2022 - Present

- I managed and executed the development of a meal ordering solution that reduced waiting time to collect meals by 70%.
- I implemented a digital wallet to the meal ordering web application which dissolved the use of debit cards or cash for payments.
- Successfully developed and launched several web-based applications, resulting in increased user engagement and satisfaction.
- I successfully developed a purchase request system that allows the purchasing request department to approve purchase requests from staff.

Frontend Engineer Intern

HNG Internship   October 2022 - November 2022

- Produced and assisted in the development of multiple web applications.
- Improved page load speed by 30% through optimization techniques, such as image compression and code refactoring.
- Implemented a new design system that streamlined the development process and improved consistency across the company's web properties.
